

0.75 m^{2*} self-contained, unattended, refrigerated retail outlet.

Sell any chilled product, anywhere, anytime.

*23 cubic feet

Simply swipe to open, select your items, and close the door. 1-2-3.

No product scanning. No cashiers. No cash required. No wasted time.

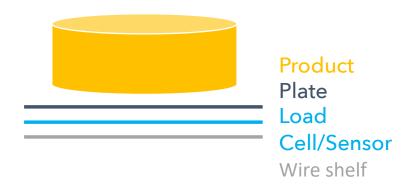

- ➤ A preregistered card is presented to the display on the cooler door.
- This can be a credit/debit card, employee ID, smart phone, or other method.
- > The card/account is recognised, and the cooler door is unlocked.

- > The customer selects items by removing them from the cooler.
- Details are itemised on display screen product, quantity, price.
- > Unwanted items can be placed back in the cooler, and will not be charged.

- > The sale is processed when the customer closes the cooler door.
- Preregistered accounts can have transaction receipts emailed.
- > The unit is ready to receive the next customer.

It uses a series of sensors within the cooler, loaded with preregistered product weights, to determine when items have been removed.

Each cabinet requires an internet connection to process transactions and communicate with a cloud-based software system which manages user accounts and product inventory.

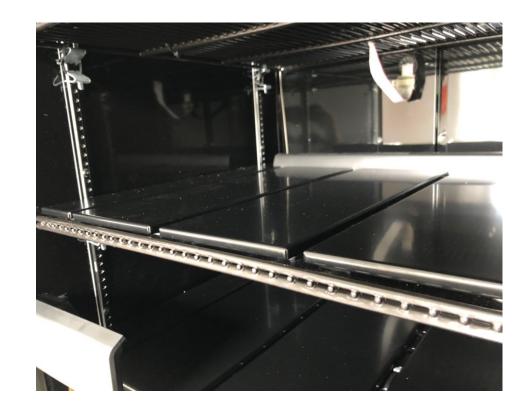

6 shelving levels comprising 24 weighted scale panels

- > 18x wide panels measuring W 150 x D 455 mm
- > 6x narrow panels measuring W 75 x D 455 mm

Each level accommodates 3x wide + 1x narrow panels.

Allowing for up to 24 different SKUs - facilitating a wide variety of products: drinks, snacks and fresh food.

Each scale is able to hold up to 20kg of product.

Standard with, Black Exterior / Black Interior

Illuminated sign panel, and front/sides decal space, customisable with your brand graphics

Payment systems sold separately

Display screen / card reader

Vender lock

"Low-E", double pane thermal insulated glass for improved energy efficiency

True RCU technology helps reduce the need for pm, increasing the operating efficiency of the cabinet and lifespan of the system

Refrigeration system maintains cabinet temperatures 0.5°C to 3.3°C, ideal for packed food merchandising and rapid cooling of beverages

LED interior lighting runs the door length, for bright and even illumination of your product display

Self closing door. Positive seal, torsion type closure system

"No stoop" lower shelf raises merchandised product level to maximise product visibility

Applications

Ideal for a wide range of applications, including any out-of-hours or unmanned retail opportunities.

- ➤ Hotel lobbies and per floor
- Office buildings
- > Schools campuses
- > Hospitals
- > Transport hubs
- ➤ Lifestyle (Gyms, Leisure)

Features & Benefits

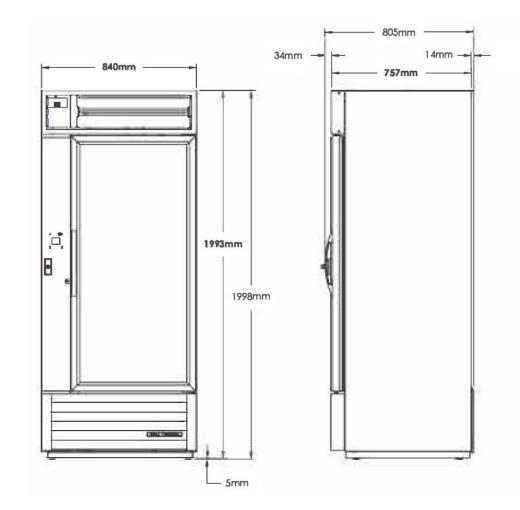

Providing people 24/7 access to refreshments for all business operating patterns

- > Look, touch & feel the product before purchasing.
- > True's advanced refrigeration systems maintain consistent temperatures keeping food fresher for longer.
- Food safety system enabled automatically locks the unit if the internal temperature stays above 7°C for 30 minutes, minimising the risk food poisoning, and automatically alerting the vendor to the issue.
- > The cabinet is able to alert customers who have registered allergy risks with an alarm, to indicate that products contained may be harmful to them.
- > R290 hydrocarbon refrigerant system, highly energy efficient, environmentally friendly, 'zero' ozone depletion potential (ODP).

Self-contained, requiring no additional kiosks or structures to operate, so can be installed in locations where space is restrictive.

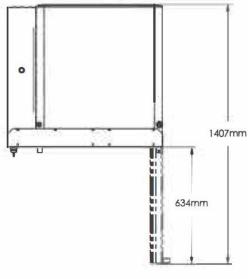

The cabinet required zero clearance left and right, for built in design to a surround, or as a module in part of a larger scheme.

Optional 10cm or 6cm castors can be supplied for easy repositioning of the unit in situ.

Cabinet Dimensions							
W	D*	Н					
921	759	1998					

*Depth does not include 42 mm for door handle.

Payment Systems

Accepts a wide range of payment solutions, including all major credit and debit cards, Apple Pay, employee cards/IDs, or unique cards designed for the cooler (Xcard by ShelfX).

A Card Reader is not supplied with the cabinet, giving operators the choice to use their preferred processor.

For European operators, we recommend NAYAX and their VPOS solutions.

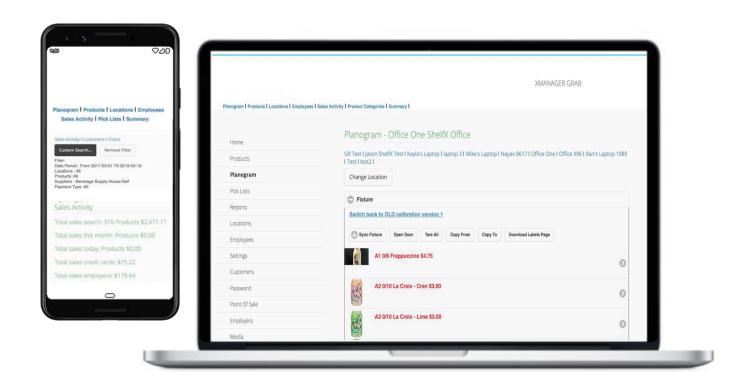

Configuration

Is a hardware and software solution, using a web-based back end (Xmanager) to configure:

- Each cabinet
- > Setup products being retailed
- > Stock management
- Employee profiles for the people operating the service
- > User profiles for the
- Sales and usage reporting

The setup process can be done onsite, from any laptop, iPad, iPhone or Android device.
