Coffee 'on the go' ordering was up 30%

More than half UK consumers (53%) indicate convenience is the main benefit of using a self-service beverage concept, with 51% making a purchase because it is the only option available.

Highlighting an opportunity for automated solutions following months of Covid-19 trading restrictions, 20% of consumers surveyed indicate their use of premium self-serve machines increased during the pandemic.

Data : Automated Coffee Report 2021 Figures are correct as of May 2021
