MAKING BREAKS
MATTER

HYDRAZON

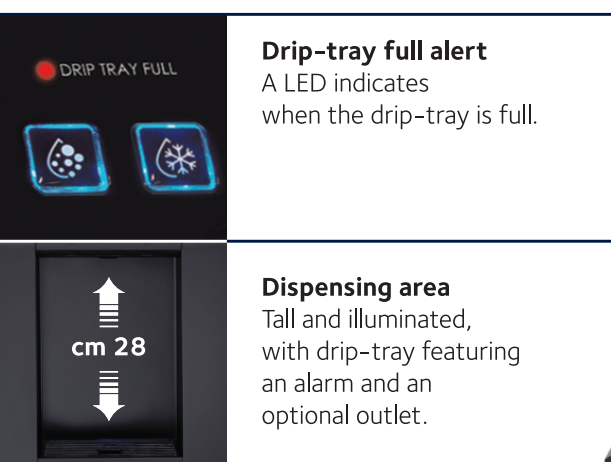

Having a source of high-quality drinking water in your workplace is not a question of convenience, but of hydration and wellbeing. The design and performance of Hydrazon are the answer.

The cooler that makes the difference.

HYDRAZON

Essential and elegant, to fit in stylishly in any surroundings. Intelligent in its design, to offer sufficient internal space to house the desired filtration (reverse osmosis - only for no FIZZ models - or active carbon).

Efficient in its performance and simple in its functionality, to dispense up to 4 different types of water. HYDRAZON is the perfect solution for any office or workplace.

LED dispensing buttons

UV
out

UV OUT system (optional)

The UV rays of the anti-bacterial lamp at the outlet of the faucet have a sterilizing effect and impede bacterial proliferation.

energy
saving

Energy saving*

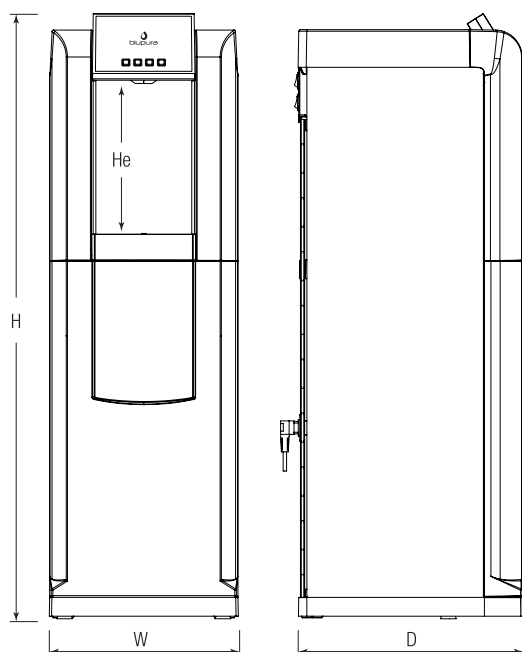

When required, the unit can function in stand-by mode, with consumption reduced by 75% compared to when fully operational (only for the Hot version).

GAS
R600

Natural gases

Use of totally natural (HC) refrigerant gases, such as R600a.

* Only for Hot versions
