Elkay ezH2O® Refrigerated Surface Mount Bottle Filling Station Filtered 8GPH Stainless Steel - LZ8WSSSM2CN.

The Elkay Bottle Filling Station provides quick, sanitary water bottle refills and promotes sustainability by eliminating single-use plastic bottles. Its sleek, fully recessed, in-wall design leaves a streamlined finish with no protrusions. The Elkay ezH2O® refrigerated surface-mount bottle filling station features quick and hygienic bottle refills for the most space-constrained applications. The smaller, 12" wall projection with touch less sensor activation and smooth, 1.1 GPM laminar flow result in a clean, splash-free fill and less plastic bottle waste, promoting sustainability.

Ideal for heavy use in commercial settings, this stainless steel ezH2O® bottle filler has a certified NSF 42/53 3,000-gallon filter that reduces lead, particulates, chlorine, taste and odour. A real drain eliminates standing water. The filter is easily changed from the front for quick, simple maintenance, and the Green Ticker™ visually counts plastic bottles kept out of landfill.

Specifications.

- **Model:** Elkay LZ8WSSSM2CN
- **Capacity:** 30 Litres/Hour
- **Dimensions:** 668 H x 431 W x 280 D

Features.

- Touchless, sensor activated
- Certified NSF 42/53 3,000-gallon filter
- LED lights
- Wall mounted
- WRAS Approved
- GreenCounter will display on screen the amount of plastic bottles saved from landfill by being refilled.
